Shenzhen Rich Age Electronics Co., Ltd

Subject: Notification of Price Adjustment

June 30, 2026

Dear Valued Partner and Customers,

We highly appreciate your long-term trust and cooperation. Upholding the principle of "Quality First, Value Oriented", We offer cost-effective audio smart hardware including Tour guide system & Smart glasses, plus full premium supporting services for clients delivering stable product quality and reliable delivery to all partners.

Global electronics supply chains remain strained amid broad raw material and component price surges, creating unprecedented cost pressures. MLCC & PCB prices rose 40%; memory, analog chips, MCUs, passives and connectors are severely short, rising material costs and supply shortages create heavy pressure on our inventory and cost management.

To guarantee stable product quality and delivery, and protect customer interests, we have conducted thorough internal assessment. Given the continuous cost pressure, we have to adjust our product prices. The detailed arrangements are as follows:

1. Scope of Price Adjustment

All product lines of Rich Age, Tour guide system and audio related products for the entire range of supporting systems.

2. Adjustment Range

The prices of all products will be increased by 15%.

3. Effective Date

This price adjustment shall take effect on July 1, 2026. All new orders placed from this date will be charged at the adjusted prices.

This adjustment is a necessary response to tough industry conditions. We sincerely apologize for any inconvenience to your procurement plans and cost budgeting. We will keep optimizing product quality, service systems and delivery efficiency to deliver more reliable products and professional services in return for your trust.

Thank you for your understanding and support. We look forward to sustained in-depth cooperation and mutual beneficial development with you.

Kind regards,

Tiger Wang (CEO)
